

Comprehensive Healthcare Panel Solutions

Panel Junction, powered by MedPanel Junction Technology LLP, stands as a global leader in delivering high-quality healthcare data collection and consulting services. With strategic offices in Delhi, India, and Romford, UK, we combine deep global expertise with precise local execution. Our bespoke solutions cater to a diverse clientele, including leading hospitals, innovative pharmaceutical firms, cutting-edge biotech companies, advanced medical device manufacturers, and comprehensive health service providers worldwide, ensuring unparalleled insights for critical decision-making.

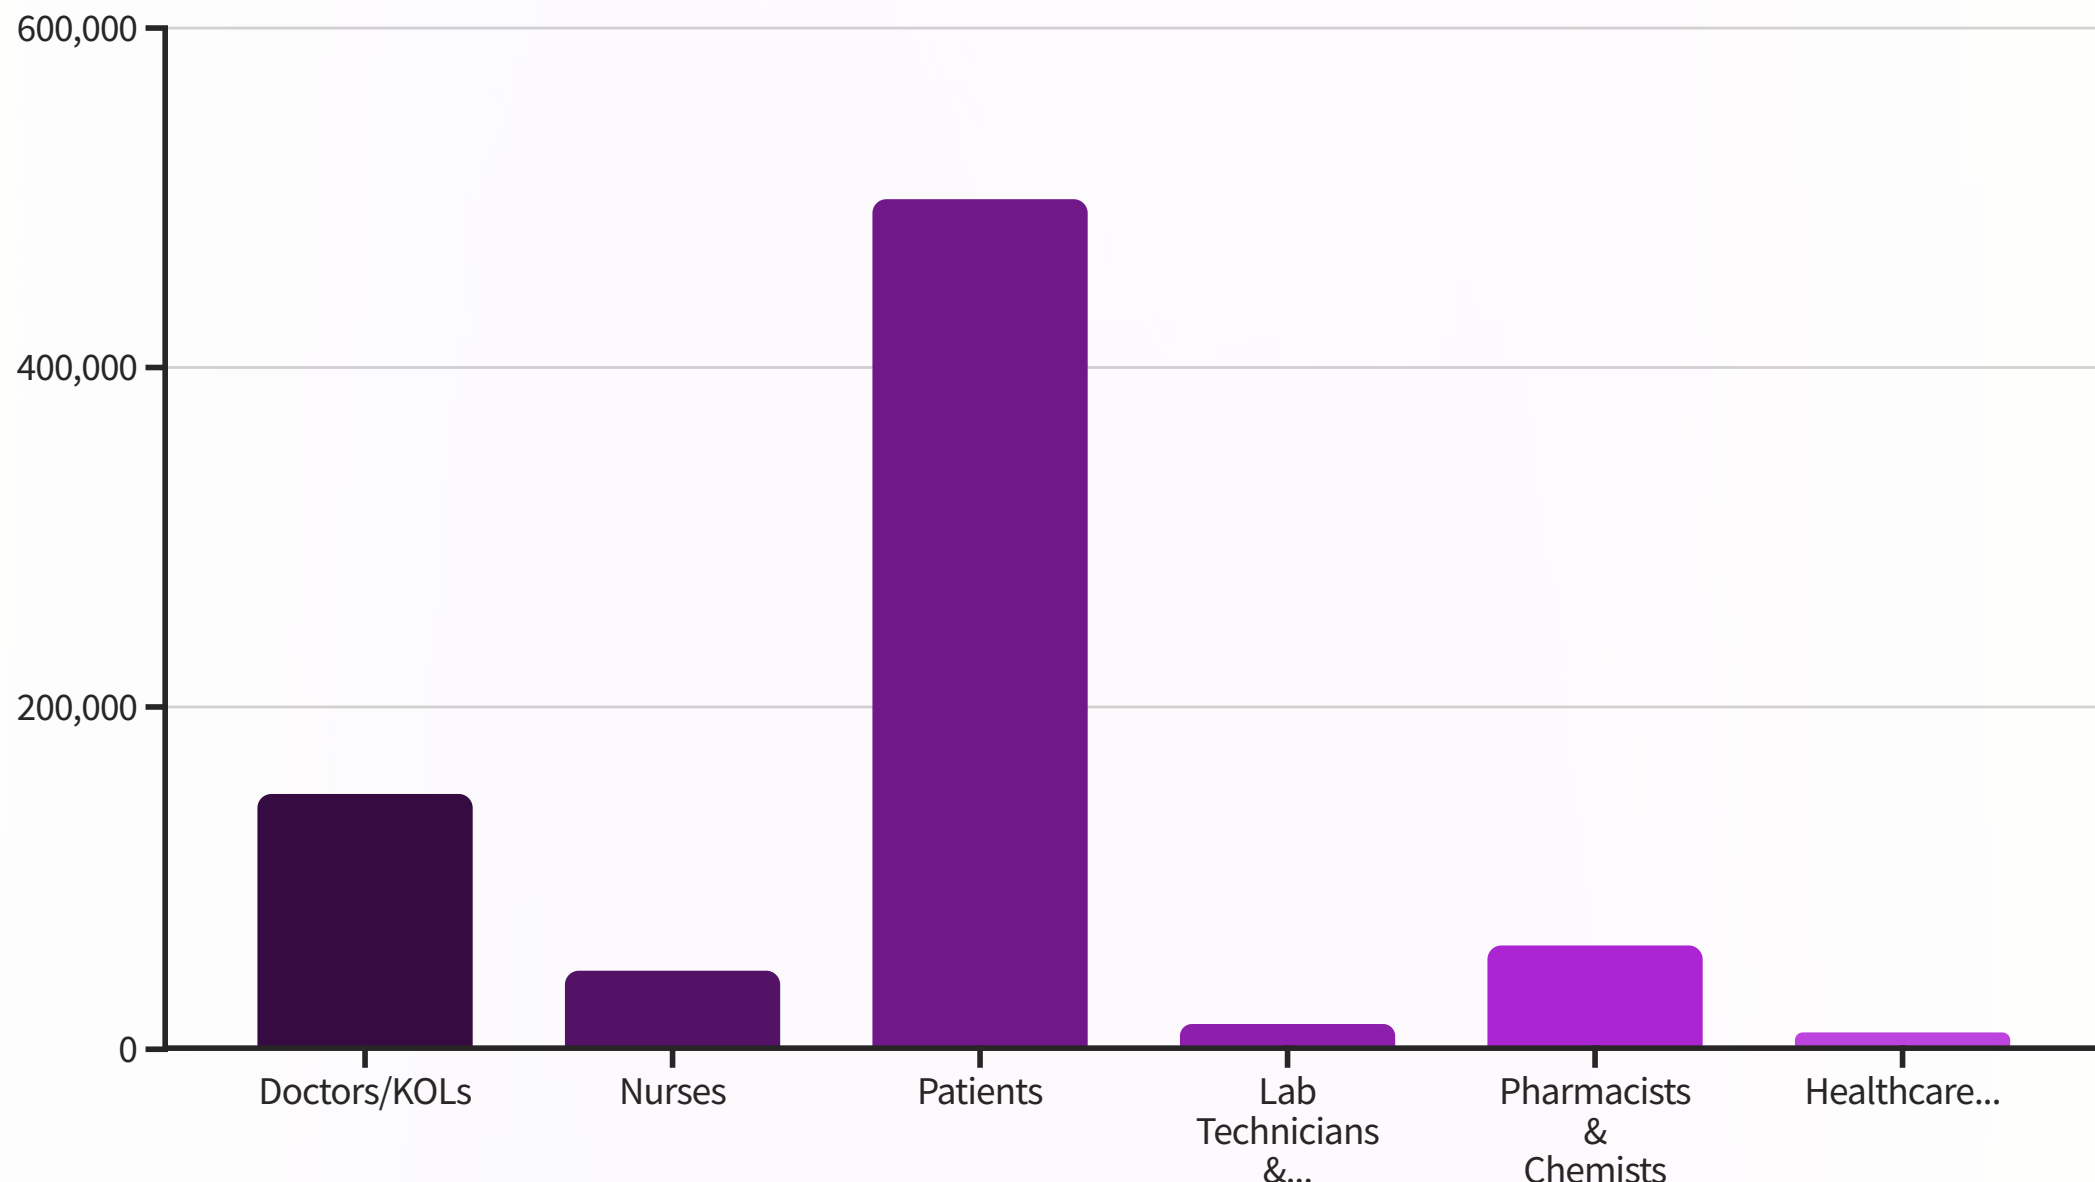

Healthcare Panel Reach – By Role:

- Doctors/KOLs:** 150,000+ globally, including highly specialized Key Opinion Leaders across various therapeutic areas, providing deep clinical and strategic insights.
- Nurses:** 45,000+ globally, covering a wide range of specialties from critical care to community health, essential for understanding frontline challenges and patient care.
- Patients:** 500,000+ profiled patients across numerous disease states, enabling nuanced perspectives on patient journeys, treatment adherence, and unmet needs.
- Lab Technicians & Pathologists:** 15,000+ experts crucial for diagnostics, research, and understanding laboratory workflows and technologies.
- Pharmacists & Chemists:** 60,000+ professionals offering insights into drug dispensing, patient counseling, and market access dynamics.
- Healthcare Decision-Makers:** 10,000+ administrators, payers, and policy influencers, vital for market access, policy analysis, and strategic healthcare planning.

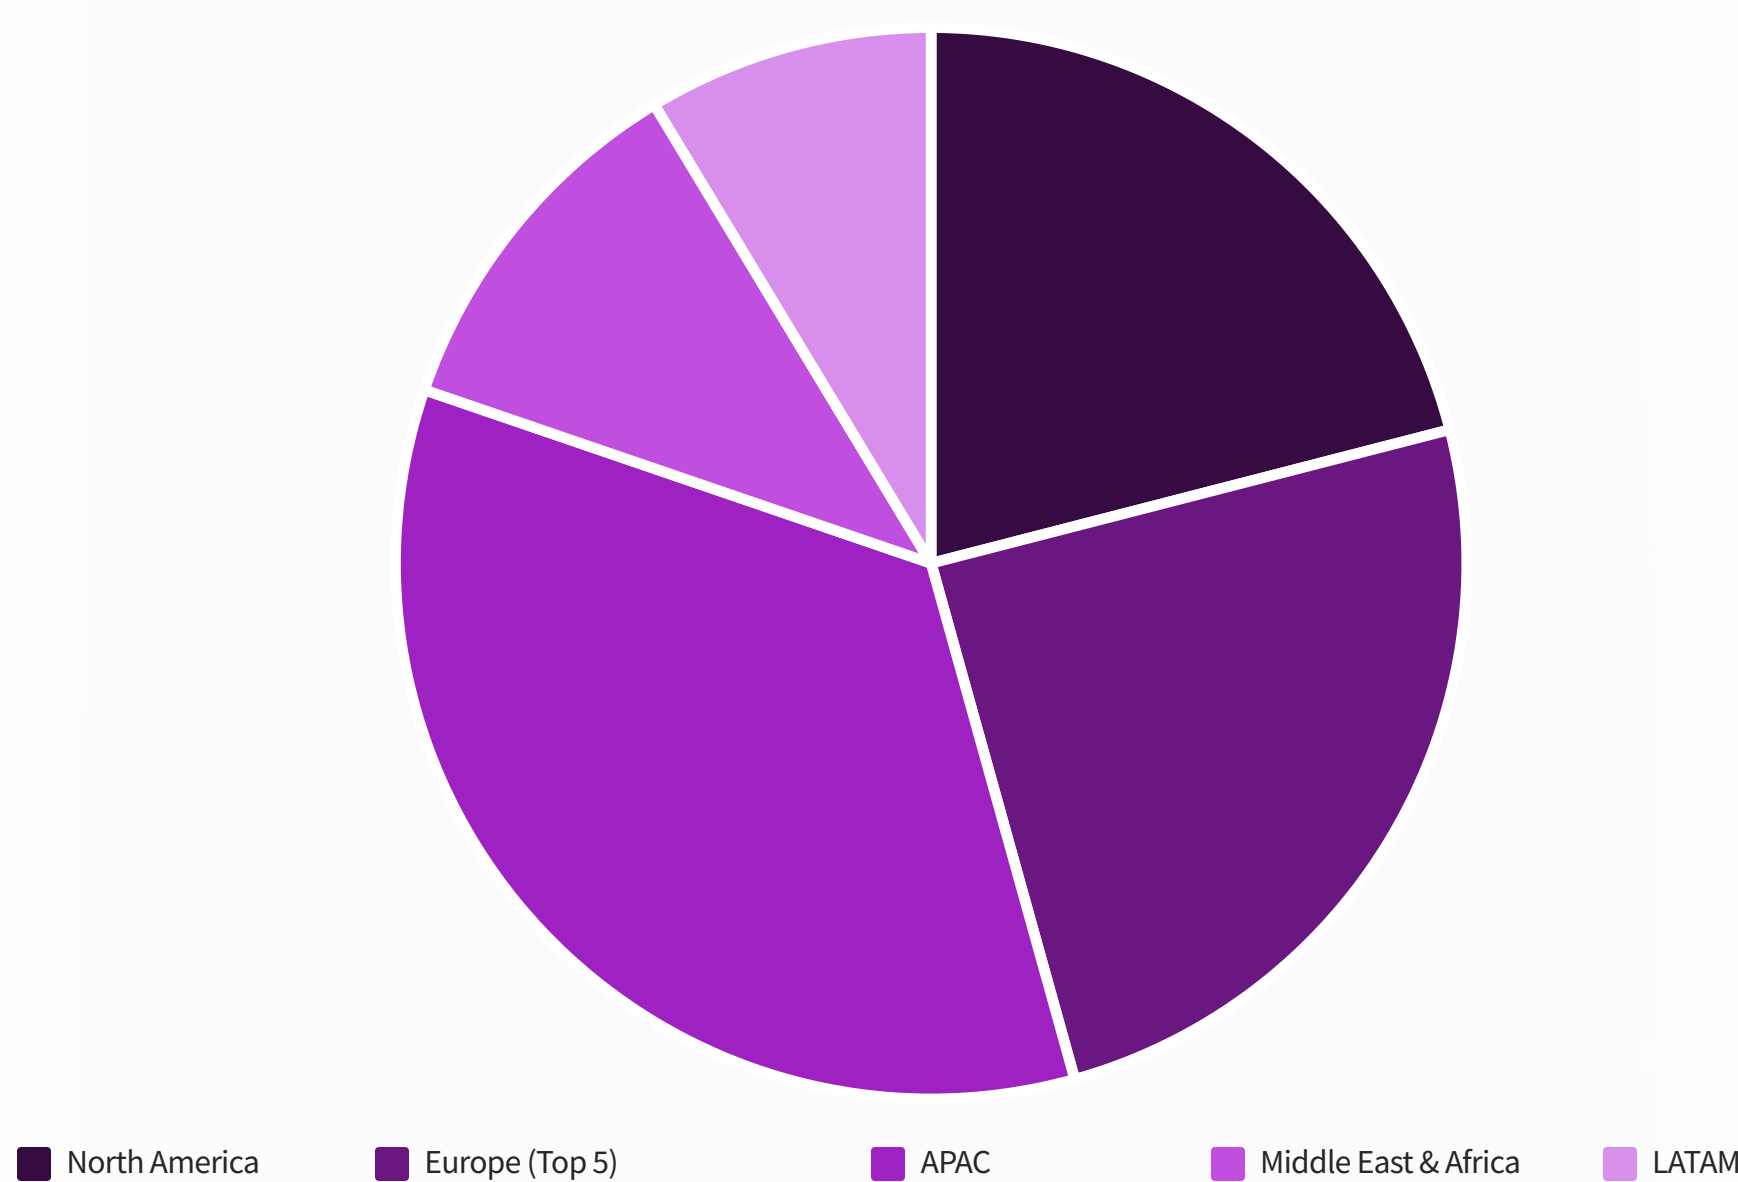

Healthcare Panel Reach – By Region:

- North America:** 85,000+ professionals and patients, ensuring robust representation across the US and Canada for critical market intelligence.
- Europe (Top 5 countries: UK, Germany, France, Italy, Spain):** 100,000+ key stakeholders, providing nuanced understanding of diverse European healthcare systems and regulations.
- APAC:** 140,000+ respondents from dynamic markets including India, China, Japan, and South Korea, crucial for understanding emerging trends and regional specificities.
- Middle East & Africa:** 45,000+ panelists, offering valuable insights into developing healthcare landscapes and unique regional challenges.
- LATAM:** 35,000+ experts and patients, supporting in-depth research across diverse South American markets.

Healthcare Panel Reach by Role

Healthcare Panel Reach by Region

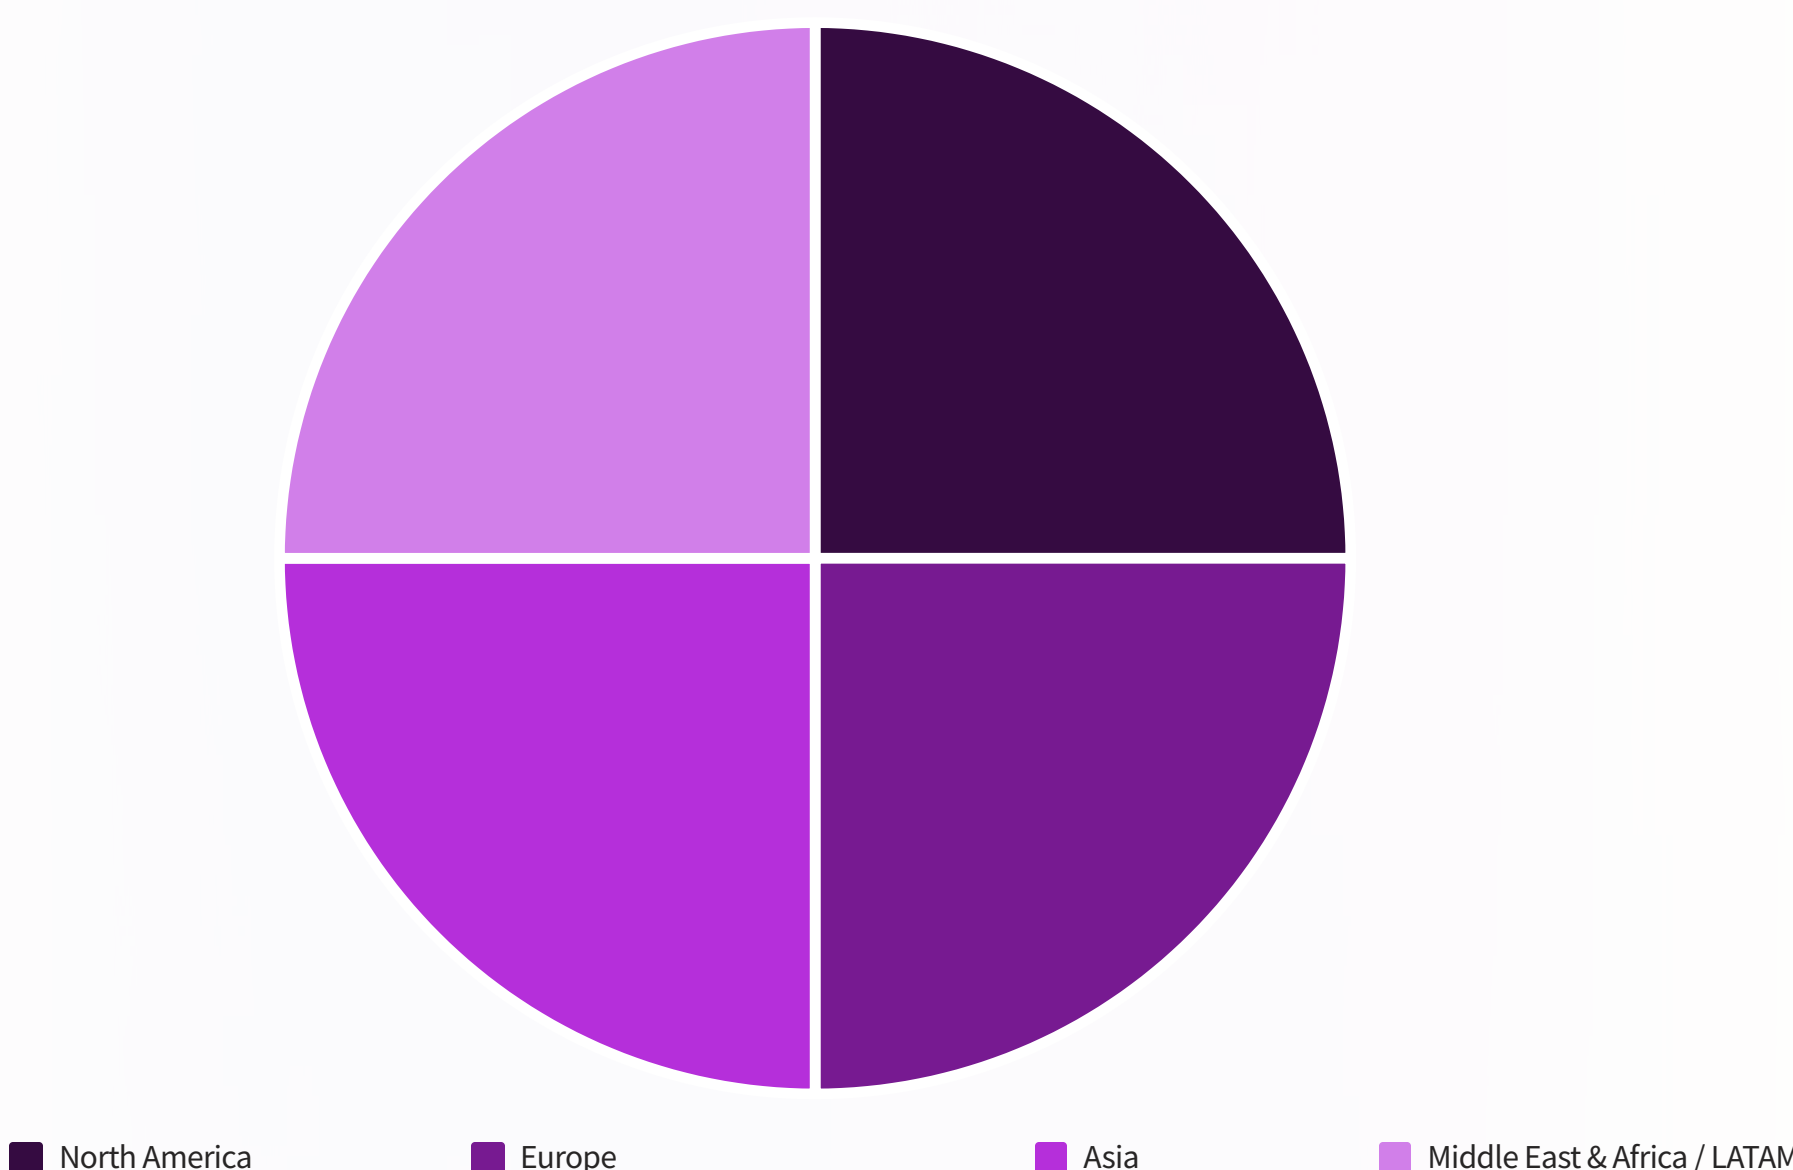

Key Therapeutic Segments Covered

Our extensive panel reach spans a wide array of critical therapeutic segments, ensuring we can provide targeted insights for virtually any medical field. We possess deep expertise in the following areas, among many others:

- Neurology**
Comprehensive coverage across conditions like Epilepsy, Alzheimer's, Parkinson's, and other neurodegenerative disorders, focusing on patient pathways and treatment effectiveness.
- Pulmonology**
In-depth insights into respiratory conditions such as Asthma, COPD, Long COVID, and rare lung diseases, analyzing diagnosis, management, and emerging therapies.
- Cardiology**
Expertise in Heart Failure, Hypertension, Arrhythmia, and other cardiovascular diseases, including device preferences and intervention strategies.
- Rheumatology**
Specialized panels for RA, Psoriasis, Lupus, and other autoimmune and inflammatory conditions, exploring treatment paradigms and patient quality of life.
- Infectious Diseases**
Critical data on HIV, Hepatitis, COVID-19, and emerging infectious threats, focusing on epidemiology, treatment compliance, and vaccine attitudes.
- Diabetology**
Detailed insights on Type 1, Type 2, Insulin Users, and complications of diabetes, including device adoption, medication adherence, and lifestyle interventions.

Global Case Studies: Demonstrating Impact and Expertise

Our commitment to delivering actionable insights is validated through successful projects across diverse regions and therapeutic areas. These case studies highlight our capability to execute complex research and provide strategic guidance that drives client success.

North America: Driving Strategic Repositioning and Policy Change

Oncologist Sentiment Study (USA & Canada): Conducted 75 in-depth IDIs with KOL Oncologists to comprehensively assess sentiments toward novel PD-L1 inhibitors in NSCLC. This critical research provided actionable insights, directly informing and optimizing the client's market repositioning strategy for maximum impact.

Nurse Wellness Survey (USA): Executed a robust mixed-methods (Quant+Qual) study involving 450 ICU nurses post-pandemic. The findings were instrumental in identifying key stressors and informing hospitals' revised shift policies, significantly improving nurse well-being and retention.

Patient Device Preference (USA & Canada): Facilitated 800 detailed interviews with Type 2 Diabetes Mellitus patients to understand their acceptance and preferences for Continuous Glucose Monitoring (CGM) devices. The insights gained directly refined the UI/UX design, enhancing user satisfaction and market adoption for a leading medical device firm.

Europe (UK, Germany, France, Italy, Spain): Guiding Market Entry and Product Optimization

EHR Adoption Barriers (UK): Interviewed 45 CIOs to identify key barriers and enablers for Electronic Health Record (EHR) implementation in both NHS and private hospitals. This strategic intelligence was vital in guiding a cloud provider's successful market entry strategy.

Biosimilar Launch Feasibility (Germany): Conducted a comprehensive survey and IDIs with 120 Rheumatologists to assess attitudes toward biosimilar switching. The insights led to significant revisions in pricing and market communication strategies, ensuring a more effective product launch.

Oncology Patient Journey (France): Mapped the intricate breast cancer patient journey through engagement with 300 patients and 60 oncologists. This detailed analysis pinpointed critical support gaps, enabling the development of targeted patient support programs.

Asia (India, China, Japan, South Korea): Informing Healthcare Expansion and Public Health Initiatives

Hospital Feasibility (India): Assessed the feasibility of interventional cardiology expansion through consultations with 30 CXOs and 150 Cardiologists. This rigorous study resulted in a robust strategic roadmap for hospital growth and service development.

Diabetic Foot Ulcer Management (China): Gathered critical insights from over 100 physicians on current Diabetic Foot Ulcer (DFU) management approaches. The findings significantly improved the positioning and market penetration of a specialized wound care product.

COVID Vaccine Hesitancy (Japan): Surveyed 300 elderly respondents to understand patterns and underlying reasons for vaccine refusal. The data provided crucial guidance to the Ministry of Health, aiding the development of more effective public outreach campaigns.

Middle East & Africa / LATAM: Shaping Advisory Boards and Adapting Public Health Models

Oncology KOL Panel (UAE): Assembled a panel of 25 high-tier Oncologists to gather profound insights on targeted therapy developments. Their contributions were instrumental in establishing a strategic global advisory board for a leading pharmaceutical company.

HIV Therapy Compliance (South Africa): Engaged 500 HIV-positive patients to identify barriers to ART regimen compliance. The study's findings directly influenced the adaptation of NGO distribution models, leading to improved adherence rates and public health outcomes.

Hospital Equipment Need (Brazil): Conducted an assessment with 100 CXOs on post-pandemic equipment gaps in hospitals. This data enabled a major medical equipment vendor to strategically prioritize sales efforts and meet critical demands more effectively.

Security & Quality Frameworks: Ensuring Uncompromising Data Integrity

Data Security & Privacy

- Fully compliant with stringent global regulations including GDPR, HIPAA, and aligned with ISO 27001 standards for information security management.
- Implements robust SSL encryption and secure tokenized sessions to protect data in transit and at rest.
- Utilizes multi-factor verification and continuous session monitoring to prevent unauthorized access and maintain data confidentiality.

Fraud Prevention

- Employs advanced device fingerprinting to detect and prevent duplicate responses from the same user or device.
- Leverages sophisticated IP monitoring and integrates CAPTCHA layers to mitigate bot and fraudulent activity.
- Applies dynamic quality scoring (WiseScore) and automatic panel quarantine triggers to ensure only high-quality, authentic responses are included.

Ethics & Compliance

- Strict adherence to ESOMAR guidelines (ESOMAR 37 & 28) for ethical market research and data protection.
- Partners exclusively with ISO 20252 certified organizations, ensuring international standards for market, opinion, and social research.
- Fully COPPA-compliant for studies involving respondents under 18, safeguarding children's privacy online.
